PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with around 10 years of experience in system infrastructure and cloud technologies. Skilled in AWS, Kubernetes, Terraform, and CI/CD pipelines. Along with technical expertise, has a strong background in managing servers, web infrastructure, and tech business operations to ensure reliable and high-performing systems.

Core Competencies & Technical Keywords

Kubernetes (EKS) | Terraform | AWS Cloud Architecture | CI/CD & GitHub Actions | Docker | Linux / Ubuntu Administration | Infrastructure as Code (IaC) | Route 53 & Global Routing | System Reliability & Monitoring

PROFESSIONAL EXPERIENCE

DevOps & Cloud Engineer | ZNGBD | Dhaka / Remote | Jan 2024 - Present

- Design, run, and scale Kubernetes (EKS) clusters and surrounding AWS infrastructure, ensuring high availability and smooth traffic handling under heavy loads.
- Automate infrastructure provisioning and configuration management using Terraform and Ansible, reducing manual setup time by up to **70%** and enforcing strict version control.
- Build and manage robust CI/CD pipelines via GitHub Actions to enable safe, multi-deployment daily release cycles and rapid rollbacks when needed.
- Develop Bash and Python scripts to automate routine operational tasks, backups, and comprehensive system monitoring.
- Implement robust security measures using IAM policies, security groups, and VPC configurations following cloud security best practices.

System Administrator & Infrastructure Lead | MSK Systems | Jan 2019 - Dec 2023

- Managed international server infrastructure (including procurement and management of servers via providers like Multacom) to deliver reliable local cloud solutions and hosting to clients in Bangladesh.
- **Linux Server Administration:** Handled Linux-based server environments, ensuring high availability, performance optimization, and rigorous security hardening.
- **Client Technical Support:** Acted as the primary point of contact for technical support, diagnosing and resolving complex server and networking issues.
- **Business Operations & Environment Setup:** Configured initial servers, networking components, and managed technical resources to establish stable foundations for client web applications.

Digital Infrastructure & Operations Manager | SAFA Doors and Furniture (Sales Center - Dhaka) | Mar 2016 - Dec 2018

- Developed, customized, and maintained the official business website on WordPress, ensuring high performance, mobile responsiveness, and a smooth user experience for customers.
- Managed the complete digital presence, web architecture, and implemented Search Engine Optimization (SEO) strategies to drive online visibility and business growth for retail and sales operations.
- Handled digital infrastructure, technical optimizations, and web-based platforms to ensure seamless customer reach and reliable online workflows.

ENTERPRISE SOLUTIONS & FEATURED CASE STUDIES

SOLUTION 01: Multi-Region High-Availability Kubernetes Infrastructure

- **Client / Enterprise Context:** Architected and deployed a multi-regional fault-tolerant architecture for a high-throughput enterprise SaaS platform facing severe single-region vulnerabilities.
- **Execution & Technical Scope:** Built symmetrical multi-region EKS clusters across dual AWS regions using modular Terraform, combining On-Demand and Spot instances to optimize infrastructure costs by **25%** without sacrificing availability.
- **Measurable Impact:** Integrated Amazon Route 53 health-check routing to achieve automated disaster recovery, dropping RTO from hours to **under 5 minutes** and cutting unplanned downtime by **40%**.

SOLUTION 02: Automated Serverless CI/CD Pipeline & Hybrid Migration

- **Client / Enterprise Context:** Modernized legacy deployment workflows for a client platform plagued by manual script errors and configuration inconsistencies.

- **Execution & Technical Scope:** Engineered a secure hybrid production pipeline using GitHub Actions, AWS SAM/Lambda backend services, and static frontend hosting on EC2 Nginx instances.
- **Measurable Impact:** Streamlined code-to-production deployment velocity, completely eliminating manual downtime through strict automated quality gates and dynamic API configurations.

SOLUTION 03: Immutable Infrastructure & Compliance Automation Framework

- **Client / Enterprise Context:** Addressed unpredictable production failures caused by risky in-place server patching and configuration drift for enterprise hosting clients.
- **Execution & Technical Scope:** Developed an automated golden AMI pipeline using HashiCorp Packer, Ansible, and AWS Auto Scaling launch templates.
- **Measurable Impact:** Enforced strict baseline compliance and automated vulnerability scanning prior to deployment, guaranteeing absolute system predictability and zero manual troubleshooting on live servers.

ENGINEERING PHILOSOPHY & PRODUCTION MINDSET

- **Reliability:** Prioritizing automated health checks, high availability, fault isolation, and graceful failure patterns.
- **Security & Compliance:** Enforcing least privilege access, strict secrets management, vulnerability scanning, and RBAC policies.
- **Observability:** Designing actionable signals using metrics, structured logs, dashboards, and automated alerting.
- **Safe Delivery:** Implementing strict quality gates, automated rollouts, rollback mechanisms, and approval safeguards.
- **Cost Efficiency:** Optimizing cloud spend through intelligent right-sizing, lifecycle policies, spot integration, and autoscaling.

EDUCATION

- **B.Sc. in Computer Science & Engineering (CSE)** | Daffodil International University | 2015
- **Diploma in Computer Technology** | Barisal Polytechnic Institute | 2009
